Client : NHS

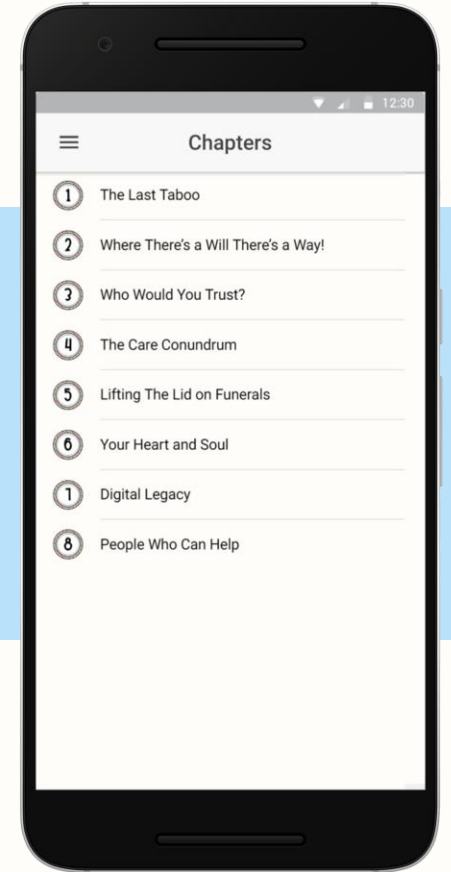

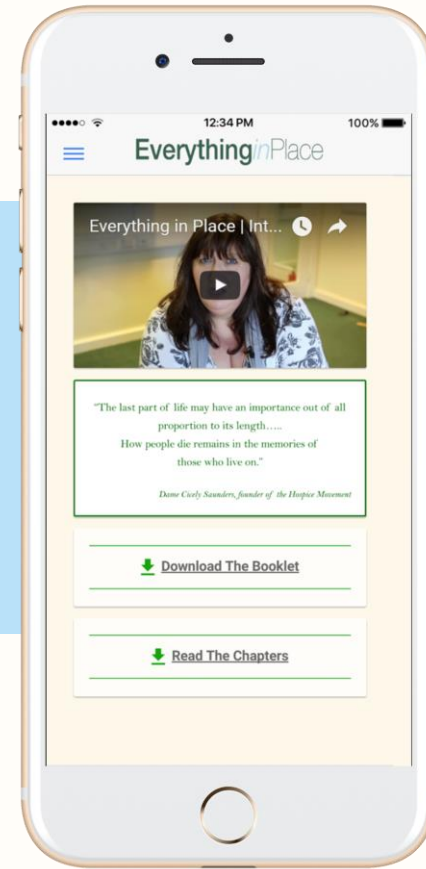

We live in a society that makes it difficult to think and talk about death. This application has all the information you need to ensure Everything is in Place before the end of your life. Everything in this app is easily accessible, from interactive menu's to take you to your desired chapter, to downloadable forms to print off and fill out at home. This application was built using Ionic and runs on both IOS and Android.

Our Solution:

- + **Ionic:** Made using the ionic framework so can be easily edited and updated in the future
- + **Multiple Languages:** App was written in HTML, Typescript and SCSS
- + **Google Drive:** Integrated google drive into the app allowing users to download, view and print pdfs.
- + **Organised Information:** Converted content from original paper based booklet to be displayed in native app components (such as cards).
- + **Quick Scrolling :** Buttons on page scroll user down to specific sections, improving navigation.

Key Features/Requirements:

- + **Streamlined UI:** Users can easily navigate between pages and find the specific section they are looking for via the nested interactive menus and content lists.
- + **Printable PDFs:** Users can download and print any of the sections allowing them to work on the booklet.
- + **Embedded Videos:** Videos embedded onto each chapter so user can quickly understand what each chapter is about.
