UCL

for doctors and parents to communicate over kid's kidney problems...

infoKID is an online information resource for parents whose kids are diagnosed with kidney problems at an early age. This app is a product of the collaboration between UCL CS Department and infoKID to enhance parent/doctor interaction. infoKID app allows parents to register and thereafter, just log-in to the app to enjoy instantaneous updates on their child's medical condition and lots and lots of other features.

KEY FEATURES

- ✓ Provides information about the main kidney problems in infants/young people.
- ✓ Educates parents about their child's kidney condition.
- ✓ Provides details of required treatment and tests according to the problem.
- ✓ Notifies parents about the next appointment and details related to it.
- ✓ Provides link to infoKID website
- ✓ Stores photos of clinical letters

Compatible with all iOS-based devices.
