

Isolation prioritisation

NHS

UCL

A web application for managing hospitals rooms and determining the patient's priority for isolation. The app provides a centralised hub for managing the patients and planning their distribution across hospital's rooms.

Client: Annette Jeanes, UCLH Hospital
Team 42: Andrei Margeloiu, Andrei Barbu, Gleb Skryabin

Key features:

- Ability to record patient's diagnosis
- Sort patients according to their urgency
- Manage the hospitals rooms and the patients inside them
- Completely customize the system, including diseases and rooms

Technology
